1. The BIV has a liaison channel to the Berlin Document Center. In all probability BIV had come upon Document Center information on AGI in this manner. As a matter of record, the British and French services also have access to these files through liaison channels.

2. In this case, BIV is reluctant to request a "hands-on" check of the Center files regarding AGI. It is BIV's policy to restrict this service only to cases of the highest priority and utmost sensitivity. Recent personnel changes at the Center indicate that such cases not exceed one or two a year. Indeed, we may find in the near future that this particular service will no longer be available.

COM: As mentioned in previous correspondence, we will set forth its views concerning the status of the Berlin Document Center. This will be done when BIVCO policy has been finalized.

3. We request that we be permitted to check AGI through normal channels. At the time of our check, we shall determine whether Fritz AGI has been the subject of a BIV trace request.
